- **Poster Design:** Posters can be designed using computer programs such as PowerPoint, Corel Draw or Adobe InDesign. White text on a dark background may be used, but only sparingly. In general, white, muted or pastel backgrounds with black text are the best options. Use an appropriate balance of text and images to convey your message in an easy-to-read way.
- **Text & Font Size:** The text should be concise in order to ensure good visibility at approximately 3 feet. Include all the most important ideas, but not necessarily all finer details. The font size of the body text must not be smaller than 20 points. Text should be single-spaced. Do not use ALL UPPER CASE TEXT because it is difficult to read.
- **Tables:** Tables should be simple and easy to follow.
- **Illustrations:** The legend of a figure should appear below the figure. Illustrations are more appealing if they are in color.
- **References:** Please include **eight pertinent references at most**.
- **Permission of Images:** Please ensure that you have permission to use any images you include in the poster. This includes a license for copyrighted materials and consent forms from patients who are recognizable in photographs or images.
- **Financial Interest:** Financial interest(s), if any, must be disclosed and included in the poster. Presentations made at the Congress must not be used to promote a commercial product.
